

Section J Attachment 28
Personal Protective Equipment Requirements and Chemical Hazard Control

Demolition subcontractors working in the process area of the MDB or the process area of the MDB rubble pile will be required to use respirators for protection from particulates and agent vapor hazards when determined necessary by the subcontractors safety representative, job supervisor, and/or URS Safety Department.

The respirators will be full face-piece respirators, either North or MSA, with the following cartridges: MSA part numbers 814904 (MSA, GEM Super Cartridges/P100 filters) or North P100/Organic Vapors/Acid Gases cartridge (**North Part No. 7583P100**)

The demolition subcontractor shall have a respiratory protection program, medical certifications for respirator use, and documentation of employee training.
